Downloading the CNR System Design Guide

You can download version 1.1 of the CNR System Design Guide in Adobe Acrobat® format. To perform the download, you will need either Adobe Acrobat or Adobe Acrobat Reader®.

If you have Adobe Acrobat, click on the "CNR System Design Guide" bullet and accept the resulting legal agreement.

If you don't have Adobe Acrobat, click on the "Adobe Acrobat Reader" bullet to download Adobe Acrobat Reader. Then click on the "CNR System Design Guide" bullet and accept the resulting legal agreement.

VECTORS TECHNOLOGY

SCSI vs. ATA: Interface Comparison

December 1999

This article is available in PDF format.

Two storage technologies are dominating the PC industry—the Small Computer System Interface (SCSI) and the Advanced Technology Attachment (ATA) interface. SCSI is used for high-end peripherals in workstations and servers, while ATA is used for portable computers. This article compares the two interfaces in terms of their overall strengths and weaknesses, and provides a brief overview of each interface—like the better and like the worse.

Make the move to eGovernment

Create and reliably deliver business-critical documents anytime, anywhere, on any device. With Adobe Acrobat®, agencies around the world are achieving paper reduction, meeting accessibility goals while interacting more effectively with constituents.

Adobe products help agencies meet eGovernment goals with a broad range of [solutions](#), from distribution to moving forms online to creation of visually appealing documents.

“Adobe Acrobat is integral to our document management solution. We can now create electronic documents with digital signatures unless the documents retain the appearance of the originals.”

— Mike Jones, Grange County Planning and Development

Press room

Adobe CEO Bruce Chizen delivers keynote address reaffirming commitment to eGovernment initiatives.

Adobe Acrobat and PDF

Adobe® Acrobat® and PDF provide a powerful framework to help replace paper-based processes with electronic paper and improve efficiency across a range of government processes.
